

All Natural Compart Duroc® Pork

Quality Starts With the Right Breed Compart Duroc®, the Black Angus of Pork®

The Black Angus breed of cattle is well known for its superior quality. This same phenomenon is also true of Duroc pork. The Duroc breed excels for meat quality and eating characteristics documented in tests performed by the National Pork Producers.

Redder is Better™

Although pork is known as “the other white meat,” dark pink to dark reddish pink is the most desirable color to look for when buying pork. Darker reddish pork will typically be juicier, more tender, and have a higher pH. These characteristics are essential for superior eating quality.

Compart Family Farms®

Premium quality Compart Duroc® Pork is the result of a carefully managed pork breeding program. Compart Duroc® hogs are bred, born and raised on small farms where family members are involved in the day-to-day management of their stock. The breeding program is the result of over 55 years of combining the very best purebred lines of the Duroc breed. Compart Family Farms have also conducted extensive research and development to create a proprietary Compart Duroc® feeding program. This feeding program optimizes both the pig’s performance and its meat quality. This, coupled with raising the pigs in comfortable, environmentally stable facilities, reduces stresses that adversely affect muscle quality.

Three generations of Compart family farmers, 1961.
